

ESSE

ELECTRIC RANGE COOKERS

PRO SERIES

THE ESSE PRO SERIES

The very first ESSE stove was produced in 1854 and the company has since established an unrivalled reputation for producing high quality cookers that remain the preferred choice for discerning cooks worldwide.

We believe in building products to last and we approach customer care with a similarly long-term view. Whether taking pride of place in a farmhouse kitchen or centre stage in a contemporary open plan studio diner, your ESSE will be a cooking partner for life.

We continue to lead the market with the introduction of new products which reflect a commitment to high quality product design, British manufacturing and performance.

ESSE's innovative electric range cookers combine timeless style and elegance with the versatility required by the most adventurous cooks. The PRO series distils everything we have learnt in more than 170 years of cooker manufacturing. The result is the excellence you have come to expect from ESSE, with 40% more oven capacity.

PERFORMANCE

Performance is at the heart of the ESSE PRO series.
Performance, capacity, and versatility.

The PRO series of cookers boast 40% more cooking capacity than our classic range of electric range cookers. We have increased capacity without compromising on the performance that you have come to expect from an ESSE. With industry leading heat up times and controllability the PRO series brings accomplished cooks to the next level. Whether you want to run your cooker from minimum, slumber, or cooking temperatures, the intelligent control system and rapid heat up times of the PRO series makes anything possible.

	1000 PRO	600 PRO

W: 360mm H: 305mm D: 460mm			
Power consumption in slumber	0.2kW/hr	0.2kW/hr	
Compatible with extraction hood			

ECONOMY

Rapid heat up times and low power consumption combine
for an incredibly efficient and economical cooker.

- RUNNING COSTS:** 11.7kW or approximately £3.05 per day - reaching full cooking temperatures 3hrs a day.
- 24hrs in MIN: 5kW = £1.30 or 5 pence per hour.
 - With all zones at maximum temperature, an ESSE runs at less than 2.5kW/hr = 65 pence.
 - Cost to prepare a roast dinner and dessert using all zones of the cooker: 1.5kW = 39 pence.

1 STEAM VENTS

Independently vented ovens for different cooking environments. Vents can be opened to release steam for crispy roast potatoes, or closed for moist cakes and meat.

2 HOBS

ESSE 1000 series cookers feature both induction and cast iron hob technology. Boil pans instantly on the powerful latest generation induction or gently simmer on the traditional cast-iron hob.

Complete control over the cast-iron hob temperature allows a lazy simmer or high boil at 350 degrees. It is also perfect for cooking direct to the hotplate, add some washed green vegetables and close the lid to steam char.

3 CONTROL PANEL

Easy to use analogue controls allow precise control of the temperature of each oven, grill and hotplate. The 1600 and 1000 models include timer controls that are optional to use, allowing complete flexibility in how the cooker is used.

4 FULL WIDTH GRILL

All ESSE cookers feature a full width 3kW grill for additional cooking capacity.

5 OVENS

Large 42 litre top and bottom ovens offer an additional 40% more cooking capacity than our classic style.

ELEMENTS

ESSE's patented heat surround elements replicate the gentle cooking of a traditional range in a modern cooker.

Heating elements wrap around the oven resulting in even cooking without the need to turn food around. Surround elements allow cooking directly on the oven base, perfect for making crisp pizza or tarts without the need to blind bake.

RAPID HEAT-UP TIMES

ESSE's unique power share technology intelligently directs power to where it is needed most. This results in industry leading heat-up times. Heat the top oven to 200 degrees from slumber mode in just 5 minutes, or from minimum in 15.

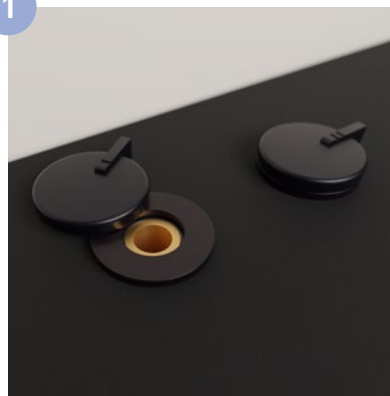

6 DOORS

Easy close doors.

7 COLOURS

Our standard colours include eight beautiful gloss finishes and two contemporary matt finishes. Our bespoke colour service allows you to colour match to any RAL colour.

600 PRO SERIES

ELECTRIC RANGE COOKERS

Not every kitchen has room for a full-sized range cooker, but that should never mean compromising on exceptional cooking.

The ESSE 600 PRO series is the ultimate miniature electric range cooker, designed for beautifully compact spaces where style, performance, and everyday cooking matter equally.

Available in both our traditional 'T' and more contemporary 'X' styles, the 600 PRO series is perfect for smaller homes, galley kitchens, apartments, or design-led renovations. It delivers

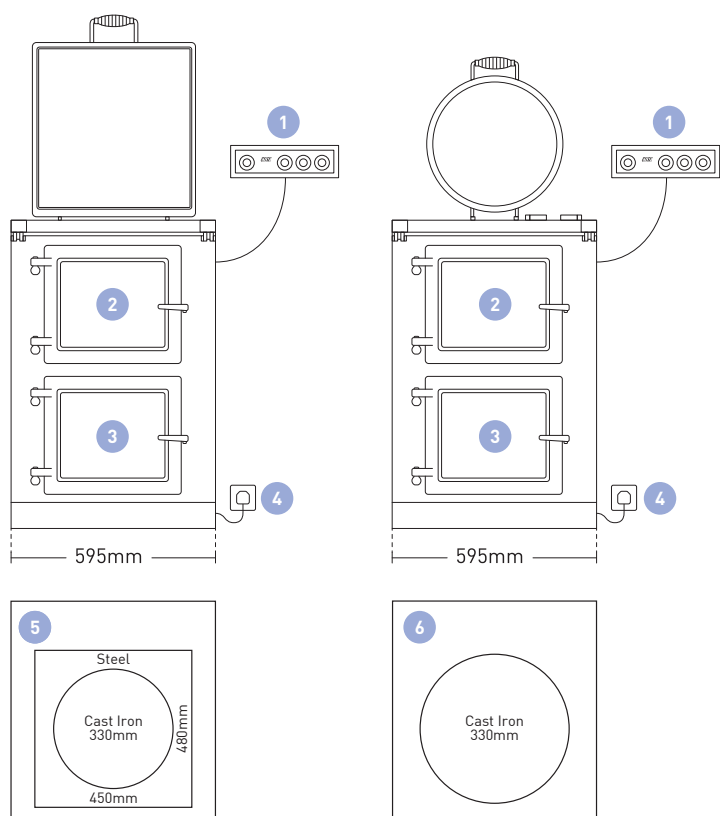

everything you love about a traditional range cooker in just 60cm of space. Handcrafted in Britain, they bring together two generous 42 litre moisture controlled ovens, a powerful grill, and ESSE's signature cast iron hotplate (with steel plancha on the 'X' models) that lets you roast, bake, simmer, griddle, and cook for family and friends with ease.

Efficient, beautifully engineered, and powered from a single 13-amp plug, the 600 PRO series proves smaller kitchens deserve extraordinary cooking too, offering timeless ESSE engineering, gentle warmth, and the joy of uncompromised range cooking, no matter the size of your home.

1000 PRO SERIES

ELECTRIC RANGE COOKERS

For those who love to cook, the ESSE 1000 PRO series brings everything people know and love about ESSE, now with 40% more oven capacity for even greater freedom in the kitchen.

Engineered with ESSE's patented Heat Surround Technology, the 1000 PRO series delivers beautifully even cooking results with exceptional baking performance, while innovative Power Share Technology ensures impressively fast heat-up times without unnecessary energy waste.

Available in both our 'X' and 'T' styles beautifully crafted in Britain, these best-selling electric range cookers combine

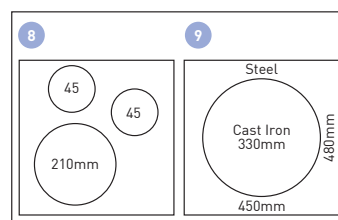

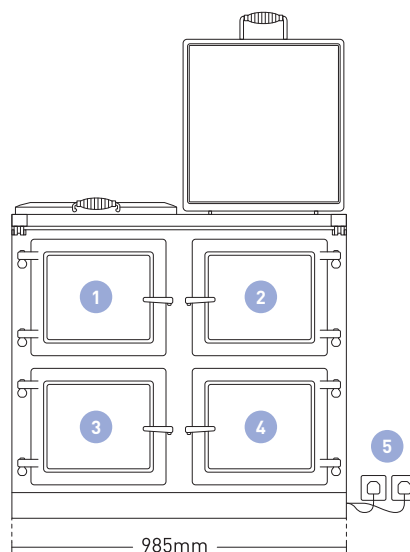

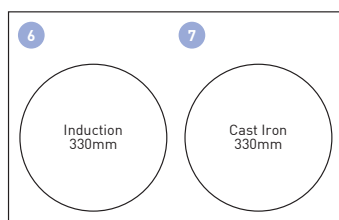

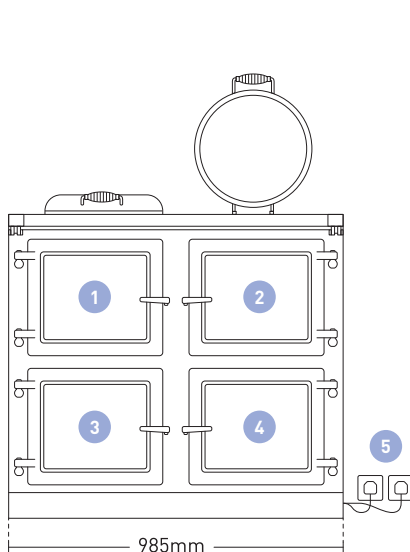

traditional cast iron cooking with modern versatility, giving you the freedom to roast, bake, griddle, simmer, and prepare multiple dishes effortlessly. Their generous three-oven capacity makes entertaining easy, while innovative intelligent technology delivers beautiful cooking results every time.

There is no need for overnight running modes or specialist cooking techniques, simply turn up or pre-programme to the desired temperature and cook with confidence. From artisan bread baked directly on the oven floor to everyday family meals, the 1000 PRO series transforms cooking into a pleasure, a statement piece built for homes where great food, craftsmanship, and connection matter most.

1600 PRO SERIES

ELECTRIC RANGE COOKERS

Available in both our 'X' and 'T' styles for those who love bringing people together, the ESSE 1600 PRO series is the ultimate centrepiece for cooking on a grand scale.

Designed for serious home cooks and passionate entertainers, these beautifully hand-built British electric range cookers combine timeless design with exceptional versatility, making everything from relaxed Sunday lunches to festive celebrations feel effortless.

With five generous ovens, two grills, cast iron hotplates and induction zones, there's space to roast, bake, grill and simmer multiple dishes all at once, perfect when cooking for a crowd. ESSE's innovative heat surround technology ensures consistently even results, whether preparing a 20lb turkey, baking artisan bread or keeping dishes perfectly warm until guests arrive.

Elegant, powerful and remarkably efficient, the 1600 PRO series transforms your kitchen into the heart of every gathering, built for unforgettable meals, effortless entertaining, and cooking without compromise.

NB: We are constantly developing and improving our products and we reserve the right to alter specifications without prior notice. Due to the limitations of the printing process, it is not possible to replicate cooker colours exactly as shown in our printed material. But trust us, they're better in person.

ESSE

SINCE 1854

TRIED & TESTED

In 1854 ESSE began producing a range of free-standing stoves incorporating at least one hotplate and an oven. These stoves gained such a reputation for efficiency and quality that the pioneer of modern nursing, Florence Nightingale, would use no other brand at the military hut hospital in Balaclava during the Crimean War.

ESSE RANGE COOKERS REMAIN THE PREFERRED CHOICE FOR DISCERNING COOKS WORLDWIDE

We take pride in upholding a time-honoured tradition of hand building our products, while embracing new technology in a process of continuous development. Each ESSE range cooker is carefully manufactured by skilled craftsmen at our factory in Barnoldswick, Lancashire, to exacting standards. From rural homesteads to River Cottage and even royalty, our range cookers and stoves bring classic styling and performance to modern living.
